Aprašymas

UNITREE Go2 Fast Charger

The UNITREE Go2 Fast Charger is an essential accessory that allows you to unlock the robot's full potential by minimizing its downtime. It is designed to provide not only lightning-fast but also completely safe recharging, which is essential for demanding commercial and research applications. This solution transforms long waits for battery charging into a brief technical break, ensuring that the equipment remains operational almost without interruption.

Advanced Features and Battery Protection

A key advantage of the charger is its impressive speed, allowing the battery to be fully charged in approximately 50 to 90 minutes, depending on the battery type. However, speed goes hand in hand with safety — the device is equipped with a comprehensive, eight-stage safety system that actively protects the battery. This includes, among other things, protection against overcharging, over-discharging, and short circuits, as well as temperature and charging current control.

Maximum Performance and Operational Continuity

Thanks to the significantly reduced time needed to recharge, the Go2 fast charger has become an indispensable tool for users who require high robot availability. It is the ideal solution for commercial applications, intensive research sessions, or long-term fieldwork, where every minute of downtime counts. Investing in a fast charger ensures that your Unitree Go2 will always be ready for action, and that its battery will be serviced not only quickly but, above all, safely.

Charging Voltage	DC 33.6V
Charging Time	approximately 50–90 minutes
Dimensions	12 x 109 x 52 mm

Gross weight: 1400, Net weight: 300, Box length: 24,50, Box width: 9,50, Box height: 11,00, GPSR Link: https://psr-assets.innpro.pl/robots/sg_robots__accessories.pdf
