Aprašymas

Essential Traction and Stability

The foot pads are key consumable components designed specifically for the Unitree Go2 robot to ensure maximum performance in walking mode. Their main task is to guarantee optimal traction and stability on a variety of surfaces. Made of specially selected, durable materials, they allow the robot to move confidently on smooth floors and uneven terrain, while effectively absorbing shocks during dynamic walking or running.

Durability and Ease of Maintenance

As components subject to the highest loads and natural wear and tear, the foot pads have been designed for maximum durability and ease of maintenance. Their simple and quick replacement does not require any special tools and allows the user to maintain the robot in full operational condition on their own. This ensures minimal downtime and guarantees that the Go2 is **always** ready to work in optimal conditions, maintaining its agility and safety of movement.

Material	Rubber, aluminum alloy, high-strength engineering plastics
Dimensions (of one pad)	45 x 39.5 x 48 mm
Weight (per pad)	56 g

Gross weight: 110, Net weight: 200, Box length: 15,00, Box width: 13,50, Box height: 3,50, GPSR Link: https://psr-assets.innpro.pl/robots/sg_robots__accessories.pdf
