Aprašymas

Protective brackets for Unitree Go2 EDU

This durable protective frame is designed to protect the Unitree Go2 EDU robot during testing and research and development work. It acts as a physical support that reduces the risk of damage to the equipment during experiments related to movement, stability, or gait dynamics. Thanks to its design, the accessory allows research to be conducted under controlled conditions, ensuring greater safety when working on new algorithms and robot behaviors.

A safe environment for testing and research

Protective supports facilitate experiments related to posture, balance, and complex movement sequences, minimizing the effects of possible errors in control or code. The use of the frame allows you to focus on software development and robot behavior analysis without worrying about accidental damage to the equipment. This solution is particularly well suited for laboratory and educational environments where testing is intensive and repetitive.

Design tailored to Unitree Go2 EDU

The frame has been designed specifically for the Unitree Go2 EDU robot, ensuring a perfect fit with its design. The brackets are made of durable, sturdy materials that provide the necessary stability during testing and research. In addition, the well-thought-out design makes it easy to assemble the accessory, so you can quickly get ready to work.

Manufacturer	Unitree
Model	077244
Compatibility	Unitree Go2 EDU

Dimensions	145.5 × 16 × 13 cm
Gross weight	9.5 kg

Gross weight: 7050, Net weight: 5000, Box length: 105,50, Box width: 16,50, Box height: 13,00
