Aprašymas

Insta360 Flow 2

Insta360 Flow 2 is a smart 3-axis smartphone gimbal designed with video creators in mind. It combines functionality, mobility and AI technology so you can create professional footage without a lot of preparation. In one compact design, you get a tripod, a selfie stick, a stabilizer and a powerbank - all so that you don't waste a moment when inspiration strikes. Whether you're capturing everyday life, creating content for social media or documenting your travels, Flow 2 will keep up with you and help you capture what matters most.

Ready to go in seconds

Just mount your phone, unfold the stabilizer arms and.... done. Flow 2 automatically enters recording mode without the need to press any buttons. This is perfect for those who value time and spontaneity - you don't waste energy on settings, you just act right away.

Stabilization that makes a difference

The 3-axis stabilization eliminates shake and vibration even during dynamic movements. Whether you're walking, running or filming from the deck of a boat, the footage will be smooth and aesthetically pleasing. It's a technology that allows you to achieve an effect straight out of a movie production - without the need for a whole crew.

Motion tracking with AI

The Flow 2 features advanced Deep Track 4.0, which allows you to focus on a selected object and keep it in frame even when it disappears from view. Artificial intelligence analyzes the movements of people, animals and objects, smoothly adjusting the frame, whether you're recording children in motion, a dog on a walk or a rider on a horse. Importantly, the Flow 2 can also track objects from a distance, maintaining high precision - perfect for concerts, sporting events or dynamic outdoor shots. And thanks to the smart composition function with a grid based on the principle of golden division, you can set the perfect point of the frame with a single touch - without limitations and without unnecessary corrections.

10 hours of operation and powerbank function

Flow 2 works non-stop all day long - up to 10 hours on a single charge. In addition, it can serve as an emergency powerbank from which you charge your phone while recording. This is especially useful when traveling or when your phone can't keep up with the pace of your ideas.

Integrated tripod and selfie stick

The integrated tripod and telescopic boom put you in full control of the frame - without the need to carry additional equipment. Now you can record time-lapses, shoot vlogs handheld or take a group photo without help from others.

Maximum features in a pocket-sized format

The Flow 2 fits easily into a bag, backpack, or even a larger pocket. When folded, it becomes a small, lightweight accessory that you can always carry with you. Whether you're out for a walk or embarking on the trip of a lifetime, it's ready to go to work with you.

Remote control from a second phone or watch

If you're filming solo, you can take advantage of the remote control feature. The Flow 2 allows you to view and control from a second phone, Apple Watch, or even using gestures. You have a preview of what you're recording and full control over the shot.

Record, edit, publish - all in one place

With the Insta360 app and FlashCut feature, you can quickly edit your recordings - automatically or manually. The editor will suggest the best moments, adjust the music and give your clips a professional touch. All without the need for a computer.

Included

- Gimbal Flow 2 x 1
- Magnetic phone clip x 1
- Charging cable from USB-C to USB-A x 1
- Protective case x

Manufacturer	Insta360
Model	Flow 2
Weight	Gimbal approx. 348 g, magnetic mount approx. 25 g
Dimensions	Folded - 97.9 × 178.4 × 36.7 mm; unfolded - 121.1 × 282.1 × 54 mm
Compatibility with phones	Thickness: 6.9-10 mm Width: 64-84 mm Phone weight: 130-300 g
Charging port	USB-C
Length of selfie stick	207 mm
Tripod	Size when unfolded - 204 mm in diameter, length - 94 mm

Battery capacity	1100 mAh
Working time	Up to 10 hours (tested at room temperature, gimbal balanced)
Charging time	2 hours (using 5V/2A charger)
Operating temperature	-10°C to 40°C
Charging temperature	0°C to 40°C
Motion ranges:	Pan: -210° to 120° Roll: -207° to 123° Tilt: -99° to 231°
Maximum control speed	120°/s
Bluetooth	version 5.0
NFC	ISO/IEC 14443A compliance
