Aprašymas

The **BCS-SU50/48** is a highly efficient, non-isolated **DC/DC converter** designed to step up voltage from a wide input range of **10-30V** to a stable **48V DC** output with a maximum power of **50W**. This converter is particularly suited for applications requiring **PoE (Power over Ethernet)** functionality, enabling the generation of a 48V supply from either a **12V** or **24V** DC source, typically from a backup power supply. Its open-frame design allows for flexible integration into various enclosures, providing versatility for different installation scenarios.

Constructed as part of the **BCS POWER** product line, the BCS-SU50/48 showcases its pioneering technology with a focus on efficiency and adaptability. The mounting of this device is simplified through dedicated **BCS enclosures** and mounting plates featuring a standardized hole pattern of **10.8mm**, allowing for both vertical and horizontal mounting options to cater to diverse application needs. This systematic approach enhances the ease of installation, making it compatible with a wide range of equipment and setups.

With the BCS-SU50/48, you gain not only a reliable power solution but also a product engineered to meet the demands of modern electronic systems while ensuring optimal performance. The implementation of a well-conceived design further emphasizes the product's competitive edge in the market.
