Aprašymas

The MikroTik wAPGR-5HaxD2HaxD&R11e-LTE7 is a versatile wireless router designed to provide reliable connectivity in various environments. With an operating temperature range from -30°C to 70°C, it can withstand challenging conditions, making it suitable for outdoor use. This router features multiple data link protocols, including support for Wi-Fi 6, allowing for fast and efficient wireless communication across various devices. Equipped with a 2-port switch, users can expand their network effortlessly while enjoying data rates of up to 1200 Mbps on the 5 GHz band. In addition to its robust performance, the MikroTik router is built with a variety of compliance standards, including IP66 for resistance to dust and water. The integrated Power over Ethernet (PoE) capability simplifies installation by allowing power and data to be transmitted over a single cable. With features like CPU temperature monitoring and voltage monitoring, users can keep track of their device's performance, ensuring longevity and stability in network operations.
