Pagrindinės savybės

- ✓ Component for: MILC/SLR Black
- ✓ Lens structure (elements/groups): 11/9
- ✓ Aperture range (F-F): 1.8 - 22
- ✓ Maximum aperture number: 1.8
- ✓ Closest focusing distance: 0.22 m

Aprašymas

A fast, versatile prime for all occasions

Offering outstanding image quality even at its maximum F1.8 aperture, this compact, lightweight 35mm prime lens for full-frame cameras is a versatile choice for everything from tabletop photography to the great outdoors. Fast, precise, quiet AF operation and reliable AF tracking make it suitable for shooting videos as well as stills.

Compact and lightweight with full-frame coverage

Thanks to innovative optical design, this large-aperture lens weighs a mere 280g (9.9oz.) and is just 65.6mm in diameter by 73mm in length. That convenience and mobility come with superb image quality that makes it a great all-around choice for stills and movies. It is a full-frame lens, but also balances well with APS-C bodies, providing an equivalent focal length of 52.5mm that is ideal for portraits and snapshots.

High corner-to-corner resolution from the widest aperture

An aspherical element is strategically implemented in this lens's advanced design to suppress optical aberration and achieve high resolution right

out to the image periphery. Smooth bokeh is also available when needed, supported by a 9-blade circular aperture mechanism that contributes to natural looking highlights. 0.22m (0.73ft.) minimum focus distance and 0.24x maximum magnification make this lens useful for closeups too.

Versatile and reliable for a range of shooting situations

A conveniently placed focus hold button not only offers easy focus hold control, but can be assigned to a variety of other functions from a menu accessed via the camera body. The lens also features a focus mode switch that allows instant switching between auto and manual focus. A dust and moisture resistant design¹ ensures maximum reliability in challenging shooting environments.

Quiet, reliable AF tracking for movies as well as stills

The narrow depth of field available at a wide F1.8 aperture makes focus critical. The fast response and high precision of this lens's linear-motor AF drive system ensure fast, precise, quiet autofocus operation. Outstanding AF performance is available not only for stills, but also for movies where "wobbling" is employed for delicate continuous focus control.

FE 35mm F1.8 compatibility

Follow the link below for lens/body compatibility details.

Some camera bodies may require soft update for full functionality.

Techninė specifikacija

Specifications	
Sandėlio grupė	Photo, Video > Accessories > Lenses [+3][-30]
Lens system	
Component for	MILC/SLR
Lens structure (elements/groups)	11/9
Minimum aperture number	22
Closest focusing distance	0.22 m
Maximum aperture number	1.8
Lens mount interface	Sony E
Aperture range (F-F)	1.8 - 22
Number of diaphragm blades	9
Performance	
Camera brands compatibility	Sony
Maximum magnification	0.24x
Design	
Product colour	Black
Weight & dimensions	
Diameter	6.56 cm
Filter size	55 mm
Length	73 mm
Weight	280 g

Packaging content

Lens cap included	Yes
