Aprašymas

NEEWER GL25B Side LED Light

Creating high-quality video content, hosting live streams, or even daily video conferences all require the right lighting. The NEEWER GL25B was designed specifically for these applications—it combines a large illumination area, soft and eye-friendly light, and convenient operation without unnecessary complications. The compact LED profile fits easily on a desk, and thanks to its quiet, fanless design, it won't distract you while working or recording. A wide range of color temperature and brightness adjustments allows you to tailor the lighting to any scene, whether you're streaming, recording content for TikTok or YouTube, or simply want to look your best during online calls.

Large LED panel and natural, even light

The GL25B model is equipped with as many as 176 LEDs hidden behind a white diffusion panel, ensuring that the light produced is bright, even, and visually pleasing. The 12.9-inch design effectively eliminates harsh shadows and unpleasant reflections, which is crucial for streaming or product photography. With a brightness of up to 2,300 lux at a distance of 0.5 m, the panel works perfectly as both a main and auxiliary light. A wide color temperature range from 2900K to 7000K allows you to seamlessly transition from warm, atmospheric light to cool, studio lighting ideal for work and broadcasting. You also have access to smooth brightness adjustment and a CRI of 98+, which guarantees natural color reproduction and a professional look for your recordings.

Soft, eye-friendly lighting

Advanced edge-lit technology provides gentle, diffused lighting that looks much more natural than classic spot LED lights. The light is soft and easy on the eyes, even during hours-long broadcasts, computer work, or late-night recording sessions. The use of high-quality components and professional electronics ensures stable 25W light output without flickering or sudden changes in brightness. This makes the image look professional and makes long streaming sessions more enjoyable.

Complete silence during recording and streaming

The NEEWER GL25B uses an innovative fanless cooling system, allowing it to operate completely silently. This is a huge advantage during streaming, podcasting, recording commentary, or video conferencing, where even the slightest fan noise can be picked up by the microphone. The housing is made of materials that effectively dissipate heat, and additional ventilation openings on the back of the panel help maintain a stable operating temperature without the need for active cooling. The result is not only high user comfort but also more professional working conditions for content creators and streamers.

Wireless Control

The panel can be operated directly from the device or using the included RT100 remote control, which allows for wireless control of one or multiple lights simultaneously. This is a convenient solution, especially during solo recording sessions, when quickly changing lighting settings without having to approach the light is crucial. The built-in 2.4G USB transmitter can be detached from the panel and connected directly to a Windows or macOS computer. Once you launch the Neewer Control Center app, you can manage your entire lighting setup without needing an internet connection, which greatly simplifies setting up your streaming, photography, or video recording setup.

Height and Angle Adjustment

The NEEWER GL25B is equipped with a practical desk-edge mount that allows you to quickly set up your setup without taking up extra space on your desk. The extendable tripod and ball head adapter allow for convenient adjustment of the light’s height and angle, so you can easily position the panel exactly where it’s needed. This solution works well for gaming streams, recording videos for social media, as well as office work or video calls. The ability to precisely position the light allows you to better illuminate your face, workspace, or selected elements of the frame without having to rearrange your entire setup.

Included

- GL25B light panel (with 2.4 GHz USB transmitter)
- RT100 2.4 GHz
- desktop stand
- ball head adapter
- power adapter
- power cable
- user manual

Manufacturer	Neewer
Model	GL25B
Number of LEDs	176
Input voltage	12 V DC
Maximum power	25 W
Maximum illuminance	2300 lx/0.5 m
Luminous flux	1400 lm
Color rendering index (CRI)	98+
Dimming range	0-100%
Color temperature	2900 K-7000 K
Channels	0-10
Remote control power source	2 AAA batteries (not included)
Dimensions (with control panel)	268 x 188 x 37.25 mm

Weight	623 g
