Aprašymas

NEEWER CB60B Bi-Color 70W LED Studio Light

The NEEWER CB60B video light is an advanced lighting tool designed for professionals and film production enthusiasts. It offers 70W of output power, ensuring effective lighting in a variety of shooting conditions. This is a bi-color model, allowing for precise adjustment of the light's color temperature—a key factor in achieving the desired mood. An additional feature is the ability to control the device via a dedicated mobile app, which enhances comfort and flexibility on set.

Bi-Color Light Color Adjustment

The NEEWER CB60B features bi-color functionality, meaning the ability to smoothly adjust the color temperature of the emitted light. The user can precisely adjust the hue from warm to cool, which is essential for accurate color reproduction and integration with existing lighting. This feature allows you to match the light color to a specific scene or creatively set the mood on set. In practice, this means greater flexibility when working in varied conditions, eliminating the need for additional filters.

Optimal 70W Power

The NEEWER CB60B video light delivers 70W of output power, which is sufficient to effectively illuminate most scenes and subjects. This specification enables effective lighting, reducing shadows and highlighting important details in the frame. The 70W power allows for bright and even light, which is crucial when capturing high-quality video footage. This solution is perfect for both small home studios and more demanding

production sets where reliability is key.

Smart control via the app

The NEEWER CB60B stands out for its ability to be remotely controlled via a dedicated mobile app, which significantly simplifies operation. The app allows for precise adjustment of key lighting parameters, such as color temperature and intensity, without the need for direct access to the light. This solution enhances workflow comfort, especially when the lamp is placed in a hard-to-reach location or during solo filming. This allows the user to quickly respond to changing conditions by adjusting the lighting in real time from their smartphone.

Included

- CB60B dual-color LED lamp
- reflector (built-in)
- power cord
- user manual

Manufacturer	CB60B
Power supply	100-240 V AC, 50/60 Hz
Maximum power	70 W
Brightness	0-100%
Illuminance	34,000 lux/1 m
Maximum color rendering index	97
Maximum color temperature	2700 K-6500 K
Bluetooth connection	2.4 GHz
Effective range	66 feet/20 m
Channel range	CH.0-CH.99
