## Aprašymas

### NEEWER BH40B Professional Lighting Kit

The NEEWER BH40B Professional Lighting Kit is a functional solution for the beauty industry, content creators, and videographers. The light is equipped with two flexible LED arms featuring 210 LEDs with a high CRI of 98+, ensuring that the light accurately renders colors and highlights details during use. Color temperature adjustment in the range of 3200K-5600K and smooth brightness control from 0 to 100% allow you to easily adapt the lighting for makeup, nail styling, tattooing, live streams, or social media recordings. The kit offers 36W of power and a maximum light intensity of 5200 lux at 0.5 m, while the flexible arms, which rotate 360°, allow for precise positioning of the light around the face or workstation.

### Convenient control and independent arm adjustment

The NEEWER BH40B is designed for convenient and intuitive operation during daily use. The touchscreen control panel with an HD display and a large knob allows you to quickly adjust brightness, color temperature, and control channels without interrupting your recording or procedure. A major advantage is the ability to control each light arm independently, providing greater control over the direction and intensity of light on both sides. If necessary, both panels can also be synchronized and controlled simultaneously, maintaining identical settings. This functionality is particularly useful during work requiring even lighting of a face or product.

### Remote Control and Features for Content Creators

The kit comes with a 2.4G remote control with a range of up to 20 meters, allowing you to adjust lighting parameters remotely without having to approach the lamp. The remote enables separate control of the left and right arms or simultaneous control of the entire setup, which facilitates work during live streams and solo recordings. Additionally, the light is compatible with the NEEWER Live 2.4G app and a Windows or macOS computer using an optional USB transmitter. The kit also includes a Bluetooth remote for remotely triggering the shutter on your smartphone, which is useful when recording footage on your phone or taking photos without touching the device.

Mobile design and convenient setup

The NEEWER BH40B works well both in the studio and for mobile use. The tripod, adjustable from 84 to 200 cm in height, allows you to comfortably adjust the lamp’s position to your workspace, and the flexible phone mount supports most smartphones available on the market. The unit weighs only 1.29 kg, so the entire kit can be easily moved between your living room, studio, and home. An additional convenience is the USB port located on the control panel, which allows you to charge your phone during live streams or long recording sessions. The set also includes a carrying bag, making storage and transport of the equipment much more convenient.

Included

- NEEWER BH40B LED lamp with dual arm
- Lighting tripod
- 2.4G remote control
- Bluetooth remote control for photos
- Flexible smartphone mount
- Power cord
- DC power adapter
- Carrying bag
