Aprašymas

FortiAI on FortiManager revolutionizes network management by integrating generative AI to automate complex tasks and enhance operational efficiency. This innovative solution offers advanced scripting assistance, proactive IoT vulnerability diagnostics, and automated network maintenance. It empowers IT teams with minimal coding experience to speed up configurations, reduce errors, identify device vulnerabilities in real time, and make informed decisions. FortiAI on FortiManager leads you to a more secure, efficient, resilient network, and eventually an autonomous network.
