Aprašymas

FortiGuard AI-powered security bundles provide a comprehensive and meticulously curated selection of security services to combat known, unknown, zero-day, and emerging AI-based threats. These services are designed to prevent malicious content from breaching your defenses, protect against web-based threats, secure devices throughout IT/OT/IoT environments, and ensure the safety of applications, users, and data. The Enterprise Protection bundle offers an excellent value through a comprehensive suite of enterprise-class security features for enterprises and other organizations with more complex environments. The Enterprise Protection bundle builds on the UTP bundle with advanced services to address SaaS application security, data security, and protection for IoT devices as part of a comprehensive attack surface assessment and monitoring service. The Enterprise Protection bundle also includes powerful AI-based inline malware prevention capabilities.
