Aprašymas

ENHANCE YOUR GPU WITH THE 4-WAY NVLINK BRIDGE FOR HOPPER

The NVIDIA 900-23946-0000-000 NVLINK Bridge Board is an innovative solution that enables efficient connectivity of up to four Hopper graphics processors. With advanced NVLINK technology, this bridge board provides high data transfer bandwidth, which is crucial for applications requiring intensive parallel processing. Its passive cooling design makes it ideal for prolonged workloads, ensuring stability and performance in the most demanding configurations. This is an excellent option for professionals looking to maximize the capabilities of their computing systems.
