Pagrindinės savybės

- ✓ Nešiojamas kompiuteris 16 GB DDR5
- ✓ CAS latencija: 40
- ✓ 262-pin SO-DIMM 1 x 16 GB
- ✓ 1.1 V

Aprašymas

Step into the future

GOODRAM DDR5 SODIMM memories represent a huge technological leap over previous generations. It is also an unprecedented performance. Users of platforms adapted to the latest standard will certainly appreciate the difference - DDR5 DRAMs represent an approximate 50% increase in bandwidth compared to the fourth generation, as well as twice the number of banks. Stability at such high clock rates is guaranteed by the PMIC, an embedded power management IC.

High performance

The advantages of using the latest generation of Goodram modules include more efficient system operation and loading, smooth switching between applications and faster operation with a large number of open browser windows. The use of appropriate technological solutions makes it possible to achieve high clocking, low power consumption and maintain the stability of DDR5

modules.

Reliability

Our fifth-generation modules use On-Die ECC technology, which allows for almost complete elimination of bit errors. For the user, this means high reliability of the modules when performing the most complex operations.

WIDER RANGE OF POSSIBILITIES

One of the most important components of our DDR5 memory modules is the PMIC (Power Management Integrated Circuit), or power management IC. It gives the modules customizable power management capabilities. The SPD HUB, is a combination of the EEPROM chip known from the previous generation of modules and the SPD (Serial Presence Detect) extended with a temperature sensor. This chip enables the storage of basic information about the module and its parameters in a broader spectrum.

Techninė specifikacija

Savybės	
Vidinė atmintis	16 GB
Atminties išdėstymas (moduliai x dydis)	1 x 16 GB
Vidinės atminties tipas	DDR5
Taikoma	Nešiojamas kompiuteris
Atminties formos koeficientas	262-pin SO-DIMM
„On-Die“ ECC	Taip
CAS latencija	40
Atminties laikrodžio greitis	4800 MHz
Atminties įtampa	1.1 V
Svoris ir matmenys	
Plotis	70 mm
Ilgis	30 mm
Aukštis	3 mm
Svoris	8 g
Pakuotės duomenys	
Pakuotės plotis	162 mm
Pakuotės gylis	52 mm
Pakuotės aukštis	10 mm
Paketo svoris	19 g
Matmenys ir svoris	
Matmenys (I × P × A)	1,00cm × 16,00cm × 5,00cm
Svoris	1,00kg
