Aprašymas

Synology RackStation RS1221RP+ NAS/Storage Server Rack (2U) Ethernet LAN Black V1500B

Synology RackStation

The Synology RackStation RS1221+/RS1221RP+ are powerful 2U 8-bay rackmount network-attached storage solutions, perfect for centralizing data management in short rack-depth environments. The RS1221+ series is ideal for handling heavy file workloads and protecting digital assets in small business environments through the comprehensive data protection options included in the DiskStation Manager (DSM) operating system.

Versatile by Design

Synology RS1221+/RS1221RP+ is a multi-purpose powerhouse, suited to a wide range of scenarios. The short form factor enables easy installation on a two-post rack (RS1221+ only) or in space-limited environments.

- Over 108,173 4K random read IOPS and 2,315 MB/s sequential write throughput¹ for demanding workloads
- Features 8 bays, for 2.5" and 3.5" SATA HDD/SSD drives, and can be expanded to 12 bays with a Synology RX418 expansion unit.

Optimized for Data Protection and Integrity

Powered by Synology DSM, our unified data management operating system with support for the Btrfs file system, data stored on the RS1221+/RS1221RP+ is safely guarded by modern data protection technologies.

- **Advanced snapshot technology** provides schedulable and near-instantaneous data protection of shared folders and LUNs
- **File and folder level data restoration offers** users who wish to restore only a specific file or folder more flexibility
- **Flexible Shared Folders and user quota system** provides comprehensive quota control for all user accounts and shared folders
- **File self-healing** allows Btrfs file systems to autodetect corrupted files using mirrored metadata and to recover broken data using RAID configurations

- **Inline compression** compresses data before writing it to the drive, to optimize storage use and reduce write commands to the drives
