Aprašymas

Rain and sun

Bullet 2C outdoor security camera is proved to be able to withstand severe environments with high shock and vibration, wide temperature specifications, high particulate content and water ingress. It will keep protecting no matter it is rainy, sunny, snowing or fogging.

Front door and back yard

Compact sleek design allows it to fit in every corner and it's easy to install. You can install it anywhere you need it, no matter at the front door or put it in the back yard. It will get every corner around or in your house covered.

Day and night

Advanced night vision technology enables the security camera to achieve early targeting across large areas in total darkness, any weather, or even fog over 98ft (30 m) away on a moonless, cloudy night, helping you reveal the secrets of the night around your house. You can even see some young boy sneaking around to ask your daughter out in the middle of night.

Build smart home with IMOU device

With a home security system, cameras can be set to start recording as soon as any part of the security system is triggered, such as a contact sensor, a glass-break sensor, or a motion sensor. This makes the cameras record everything that's happening on your property.

Respond to events cleverly

Send notification

The device will send you notification with photo preview to know whatever detected without opening the app.

Record and capture the moment

When detecting anything abnormal, the security camera will immediately record and capture the moment for you to check.

Send more relevant notification

Human detection

Different from PIR detection, you don't have to be bothered by a slight misleading, truly time saving.

Customizable detection zone

You can customize detection zone to focus on the space you truly care like your garage, children' play ground or your swimming pool. And filter out those places on road or from your neighbors' .
