Aprašymas

The S 1411 DF Heavy for Wood and Metal Sabre Saw Blade delivers fast curved cuts in wood and metal. It features a large tooth pitch (4.3 mm) and side-set teeth for achieving quick results. The blade's medium-thick gauge material (1.25 mm) provides the best balance of speed, flexibility and stability when cutting. The BIM (bi-metal) blade is optimised to cut soft nails, mild steel materials and non-ferrous metal components embedded in wood. It is equipped with a long length of 300 mm, providing a cutting capacity of up to 250 mm. For use with sabre saws with 1/2 inch universal shank systems.
