Aprašymas

The Multi Material Circular Saw Blade delivers powerful cuts in a wide range of materials. Its high-quality precision-ground carbide teeth make the blade robust enough for cutting various materials, while its base blade made of dimensionally stable SK5 hardened steel (> 40 HRC) ensures accuracy. Furthermore, the blade's expansion slots lower vibration during use, which dampens noise and reduces heat development. Use this saw blade in non-ferrous metals, aluminium, plastics, epoxy and wood. The HLTG (High-Low Triple Chip Ground) teeth make the Multi Material Circular Saw Blade robust for working with abrasive materials.
