Aprašymas

The ATEN CN800 offers superior video quality with HD resolutions up to 1920 x 1200 @ 60 Hz, facilitating easier KVM access. The CN800 USB VGA KVM over IP Mini provides "over-IP" access control for conventional KVM switches lacking built-in over-IP functionality. It enables system operators to monitor and access computers remotely using Windows and Java-based application programs. The CN800 connects to an intranet, either LAN or WAN simply by using an industry-standard Cat 5e/6 cable and to a target computer or server. WinClient and JavaClient are available for remote access, enabling IP connection and login from anywhere over the internet.

The ATEN CN800 uses the standard TCP/IP protocols for communication. It allows the connected server or computer to be accessed from any computer over the internet – whether that computer is located down the hall, in other areas of the country, or branch offices in other parts of the world. The CN800 provides a fast, reliable, and cost-effective way to remotely access and manage widely distributed multiple computer installations.
