Aprašymas

ATEN US3312 2-Port USB-C 4K DisplayPort KVM Switch with Remote Port Selector is developed for easy control and fast switch between two USB-C device sources from a single set of keyboard, mouse, and monitor. With cables coming already mounted on to it, the USB bus-powered US3312 supports two USB and one DisplayPort downstream ports, along with USB peripheral sharing capability. Containing a hook and an external remote port selector, the switch box can be placed anywhere to keep the workstation tidy while allowing users to instantly swap peripherals between the connected PCs and ensuring uninterrupted data transmission from a single user station. It supports resolutions up to True 4K (4096 x 2160 @ 60 Hz) to ensure that every detail of the video is displayed in the crisp and sharp UHD quality. The US3312 is a plug-and-play device that not only enhances the efficiency of multi-tasking, but also saves desktop space.
