Aprašymas

Minimize digital eye strain from blue light for enhanced comfort

This TAA compliant anti-blue light filter is designed to work with computer monitors with a 24-inch 16:9 display.

Blue Light Reduction

This blue light reduction shield reduces eye strain and improves visual comfort by reducing high energy blue light emitted from the display within the 390-440nm spectrum. Symptoms of digital eye strain, such as headaches, dry eyes, and blurred vision, can be reduced by using a blue-light filter.

Screen Protection

This blue light screen protector adds a durable protective film to the monitor which helps shield the screen from wear and tear including scratches, fingerprints, and dust.

Hassle-free Installation

The blue light filter offers flexible dual mounting options. Affix the bluelight filter to bezel-less displays using the transparent and residue-free adhesive strips. Alternatively, use the side mount tabs to install the screen filter on displays with bezels. The latter is recommended when frequent removal is required.

Techninė specifikacija

Features	
Product type	Anti-glare filter
Brand compatibility	Universal
Product colour	Transparent
Material	Plastic
Maximum screen size	61 cm (24")
Screen protector type	Anti-glare screen protector
Protection features	Blue light protection
Light transmission	90%
Installation type	Adhesive strip + Slide mount tab
