Aprašymas

Wireless Mouse with A View - Plus RGB LED Light and Ambidextrous Design for Left-Handed Computer Users

The Manhattan Transparent Wireless Optical USB Mouse is your attractive blend of style and functionality. Its transparent shell on a sleek silhouette showcases its components while the logo changes its colors in dynamic RGB light. The optical sensor immerses the mouse's entire edge in a stylish red.

Wireless freedom

The 2.4 GHz RF micro receiver offers an effective range of up to 33 feet (10 meters). Ambidextrous design ensures comfort for both left- and right-handed users, while the top-mount, push-button control allows you to instantly shift resolution between 800, 1200, and 1600 dpi – perfect for your daily work or gaming needs.

Silent buttons

The classic left, right, and middle mouse buttons, combined with a smooth scroll wheel offer great tactile response. They click silently – a blessing wherever you appreciate a quiet environment.

Auto-power management

Compatible with Windows, macOS, Linux, and Chrome OS, it is simple plug-and-play – no configuration or drivers required. A high-precision optical sensor allows for lag-free control on almost any surface. The auto-power management and on/off switch contribute to a long battery life, and with the USB-C port, charging the built-in battery is a breeze, e.g. with same charger you use for your phone. No need for battery changes at any time.
