Aprašymas

The Lindy USB Type C to Triple Display Converter allows users to connect either an HDMI, DVI or VGA screen to a Macbook, ultrabook or notebook with USB DisplayPort Alternate Mode.

With its lightweight, low profile design, the adapter easily fits into a notebook bag and simply expands any available connectivity options, so users can connect to the most commonly used digital and analogue video equipment, without having to carry multiple adapters - ideal for BYOD applications.

The converter is powered by the USB Bus, therefore no external power supply is needed. Installation is simple as no drivers are required and Type-C's reversible design has been developed to work regardless of which way the cable is inserted into the port.
