Aprašymas

The active high-speed HDMI™ audio video cable features copper and fiber conductors, offering a lighter and more flexible structure ideal for installation in confined spaces and longer distances: the ideal solution for conference rooms, classrooms, illuminated signs and much more. The hybrid HDMI™ cable, or Active Optical Cable (AOC), enables the transmission of high quality video and audio signals over long distances without loss of quality. Signals from sources such as Blu-ray, media players, DVD, SAT etc. are received by UHD and FullHD TVs and projectors with a resolution of up to 8K @ 60Hz. High Speed HDMI™ Fiber Optic Cable supports 8K, 4K UHD, 1080p / FullHD, 1080i, 720p, 480p video resolutions. It supports Deep Color, HDCP 2.2, EDID, CEC and ARC standards

NB: This cable features a unidirectional architecture which requires the cable to be installed in the correct direction. Check the "source" and "display" labels on the HDMI™ connectors to verify that the device and the HDMI™ source are connected correctly.
