Aprašymas

Sleek mobile phone protection for the Samsung Galaxy S26+: ultra-thin, transparent mobile phone cover that is almost unnoticeable - so the look and feel of the smartphone remains authentic

Quality based on German standards

From the initial sample to series maturity: our products undergo strict and comprehensive quality controls, managed and carried out in Germany. This enables us to guarantee compliance with all specifications, guidelines and standards – and satisfy the strictest demands.

Ultra-thin and light as a feather

Minimalist mobile phone protection: the mobile phone protective cover is so thin and light that it is hardly noticeable - it blends seamlessly into the mobile phone design and preserves the original look without weighing it down or adding bulk

Anti-yellow tint

Transparent mobile phone cover without rapid yellowing: enjoy your cover for a long time because it delays the yellowish discolouration

Protected side buttons

A clean sweep: the mobile phone cover also covers the side buttons - this protects against dust and the metal buttons allow a perfect pressure point

Custom-fit

Tailor-made mobile phone case: protects what needs to be protected and leaves free what should remain free, e.g. loudspeaker and charging socket

Camera protection through raised edges

Simply lay it down carefree: the raised edges of the phone case provide protection for the protruding camera lenses without compromising the quality of the photos

Edge protection for the display

Additional protection for the mobile phone display: The mobile phone case has a raised edge all around - so the touchscreen is better protected

> 20% from demonstrably recycled sources

And so the circle closes: this product is made up of at least 20% recycled materials, enabling us to take part in an eco-friendly cycle

Plastic-free

Packaging with a clear conscience: our packaging is 100% plastic-free, enabling us to reduce plastic waste and increase its recyclability

FSC

FSC-certified: the paper and cardboard used in our packaging comes from sustainable forest management - enabling us to take a resources-sparing approach to the raw material of wood
