Aprašymas

- Variable neutral-density filter ND2-400;
- To reduce light in case that it is too bright;
- With rotating front lens;
- Exposure correction between +1 and +8 stop values possible.

One neutral-density filter for several fields of application:

- Allows the photographer to use large apertures while taking pictures outside = background gets hazy;
- In case of exposure times longer than 1/30 seconds, water "flows", if they are shorter, it freezes to ice.

Consumer Advice:

To avoid vignetting, this filter has a superstructure of the front lens, i.e. the diameter of the front lens is larger than that of the rear lens. Please note that a lens cap with 72 mm is thus required.

Techninė specifikacija

Features

Filter size	67 mm
Product colour	Black

Packaging data

Package width	155 mm
Package depth	140 mm
Package height	31 mm

Package weight	120 g
Matmenys ir svoris	
Svoris	0,09kg
