installation.

The tester’s ‘Sink’ mode detects the signal itself from the source device and supplies valuable information including resolutions and frame rates to identify and solve any compatibility issues. The ‘cable’ mode allows for testing of the cable’s capabilities and condition, a vital feature for identify true HDMI 2.0 cables with 18G data rates within a crowded market where non-fully compatible cables exist, this information is all presented on an easy to read LCD display. As a multi-functional testing solution, the tester can also be used within installations that have multiple AV hardware as part of the connection, including 18G Cat.6 HDMI extenders and HDMI 2.0 matrices.

With a compact, portable design this device can be easily added to any Av installers testing kit without taking up a large amount of additional toolkit space, perfect for on-the-go installers in both small home setups or larger scale professional installations.

Techninė specifikacija

Technical details	
Interface	HDMI
Colour depth	16 bit
HDCP	Yes
HDCP version	2.2
Supported video modes	720p, 1080p, 2160p
High frequency rate	60 Hz
Product colour	Black
Housing material	Metal
Operational conditions	
Operating temperature (T-T)	0 - 40 °C
Storage temperature (T-T)	-20 - 60 °C
Operating relative humidity (H-H)	20 - 90%
Weight & dimensions	
Width	130 mm
Depth	89 mm
Height	14 mm
Weight	220 g
Packaging data	
Package width	420 mm
Package depth	400 mm
Package height	300 mm
Package weight	320 g
Matmenys ir svoris	
Svoris	0.43kg
