Aprašymas

MEDICAL PC KEYBOARD FOR CLEANING AND HYGIENE

The AK-C8100 is a high quality, reliable PC keyboard. The purification and disinfection capacity makes it a perfect fit in hospitals and at practitioners, as well as office, administration and industrial environments. The silicon membrane protects the key field against ingress of dirt and fluids.

The AK-C8100 impresses with low force key actuation and precise key guidance. With its 105 key standard keyboard layout, the AK-C8100 is highly recommendable for heavy duty type writing in hygiene critical operations.

Thorough surface disinfection of the key field by spray/wipe sanitizing of the seamless, low profile silicone key membrane without corners and edges.

Surface disinfection instead of invasive submersion cleaning:

- No inner or outer re-contamination by polluted suds.
- No risk of germ proliferation and transmission by fluids leaking or dripping off the keyboard.
- No contact with contaminated openings (no touch contact).

CleanFunction allows to disable the key field while cleaning (“Fn”+“Clean on/off”).

Suitable for a multitude of hospital disinfectants and cleaning agents.

Protection Class IP68 by full sealing of the key membrane with the keyboard housing or Exchange of silicone key membrane for routine disinfection.
