Aprašymas

Improve speed, accuracy and productivity. _x000D_

Manhattan CCD Contact Barcode Scanners deliver high-quality scanning for a wide range of data collection functions to help improve routine transactions, automate paper-based processes and increase productivity. The CCD (charged-coupled device) scan engine features no moving parts for years of reliable service reading popular barcodes, including UPC, EAN, ASCII and GS1 DataBar. Easy to implement and simple to use, a built-in keyboard wedge decoder sends scanned data to an active application, where it appears as if it were manually typed or directly keyed into the computer. Its USB cable interface integrates with most PCs without an external power supply. With a scan rate of 100 scans per second and an accurate read range of up to 60 mm (2.4 in.), this model offers a practical daily scanning solution for point-of-sale, shipping, warehousing, office and industrial applications to minimize manual data entry, speed transactions and reduce errors.
