Pagrindinės savybės

- ✓ Running water is portrayed as soft and flowing by long exposure times
- ✓ Popular squares become void of people through long-term exposure
- ✓ Allows large aperture openings, e.g. for portrait shots in extreme brightness: Background blurring causes the person being photographed to stand out significantly against the background

- NMC16 coating: eight layers on each side, for maximum anti-reflective properties

- Vapour-deposited nano-coating
- Developed especially for digital cameras thanks to double-sided coating
- With front thread for other filters, lens cap or lens hood
- Quality class (glass): high-quality lens glass
- 1 filter bag
- 1 ND8 grey filter
- 1 ND64 grey filter
