Aprašymas

Reliable VGA extension: 1:1 interconnected cable with HD15 plug to HD15 socket for clear signal transmission.

High-quality signal quality: Three coaxial cables (RGB) and seven data cores ensure stable image transmission.

Effective protection against interference: Overall and individual shielding and ferrite core reduce electromagnetic interference.

Easy installation: Color-coded die-cast connectors in accordance with the PC99 standard support error-free cabling.

Rugged workmanship: The robust connector design and precise pin assignment enable long-lasting use.

The InLine® S-VGA extension with HD15 plug to HD15 socket is a professional solution for extending analog image signals between monitors, projectors and computers. It provides a reliable connection for devices with a VGA connection, especially in presentation environments, educational institutions and office installations.

The cable has three single-shielded coaxial lines for RGB signal transmission and seven additional data lines. Thanks to the double shielding - consisting of overall and individual shielding - and the integrated ferrite core, the signal is effectively protected against electromagnetic interference.

The 1:1 pin assignment without PIN 9 ensures standard-compliant and stable transmission. The blue coloring of the die-cast connectors complies with the PC99 standard and makes it easier to correctly identify the connection ports. The robust design ensures high mechanical resilience even

with frequent use.

Plug type: HD15 plug to HD15 socket

Pin assignment: 1:1 (without PIN 9)

Shielding: Overall and individual shielding

Cable construction: 3x coax (RGB) + 7x data cores

Special feature: ferrite core, PC99 color coding

Color: black
