Pagrindinės savybės

- ✓ **Galium Nitride (GaN) Technology:** GaN technology is having a huge impact on 5G equipment and superfast charging. It uses high-performance internal silicon components to increase charging efficiency in an ultra-compact form factor. So, you get faster power in a smaller charger.
- ✓ **120W of Total Combined Power:** The speedport 120 delivers up to a combined total of 120W of power to charge your portable devices. Access up to 100W of power using only the first USB-C port to fully charge a large device like a laptop. Use two USB-C ports to access fast-charging power starting at 99W and higher. Or use all four ports simultaneously to access up to 119W of power collectively.
- ✓ **Charge Up to Four Device Simultaneously:** The speedport 120 charger has three USB-D PD ports and one USB-A port, so you can charge up to four devices. The USB-A port allows you to charge older devices.
- ✓ **Save Outlet Space:** The speed port 120 charger has an off-the-wall design which means it doesn't block any other spaces on your powerstrip or wall outlet. It also allows easy access to all four ports.
- ✓ **Charge Older Devices:** The USB-A port lets you charge older digital devices.
- ✓ **Strap Included:** The speedport 120 comes with a strap for cable management.

Aprašymas

Charge your digital devices faster. The speedport 120 delivers a maximum shared output of up to 120W. GaN technology increases charging efficiency and speed, so this ultra-compact charger delivers enough power to charge a MacBook Pro. The speedport 120 has three USB-C PD ports and one USB-A port, so you can charge up to four devices at once.
