Aprašymas

A triple jointed gas suspended monitor arm, designed by Multibrackets to optimize your productivity and help reducing strain on neck, back and eyes.

The M VESA Gas Lift XL HD Single Black is made out of a durable aluminum construction and uses a gas driven suspension technique. This makes the screen "float" and it can then be moved with near zero effort. Sleek and streamlined, the M VESA Gas Lift XL Single Black HD frees up space and allows positioning of your display for greater productivity. With a maxload of up to 18kg even very big monitors can be used. The height clearance is 615 mm above the desk. Rotation function is not used for widescreen or ultrawide screen monitors. The unique counterbalance gas technology provides smooth adjustment in any direction. Easy move the screen from landscape to portrait position or move the screen close to the desk, high up, matching almost any wanted working position imaginable.

Supports VESA standards 75x75, 100x100 and 200x200 holds screens weighing from minimum 9kg and up to maximum 18kg.

This interval is important to keep due to the gas driven piston that keeps your screen floating in the air.

The snap on head gives a fast assembly and disassembly of the LCD perfect for any IT department who wants to minimize downtime.

Works with ultra widescreen monitors up to 49" or max 18kg
