Aprašymas

Mechanical Arm USB Interactive Visualizer (Document Camera)

The M11-8MV is designed for digital and distance learning, and it is perfect for using as a USB camera to shoot presenters or visualize teaching materials. A compact, upright design offers versatile utility, and diverse I/O ports meet various needs, including both HDMI and VGA for connecting to displays, and USB for connecting to laptops for online teaching.

Upright Design for Convenience & Safety

An upright design offers a decisive space advantage, and a weighted base decreases the risk of the M11-8MV being knocked over, giving you a safer learning environment. Six distinct buttons ensure first-time users can dive right into teaching with it.

Flexible & Durable Mechanical Arm

Equipped with a durable mechanical arm and flexible joint, the M11-8MV provides a steady image and helps you make a lasting impact. Also, its matte-black finish and slender design bring modern style to the classroom!

Crystal-Clear Details with 20X Digital Zoom

With 8 megapixels and a 20X digital zoom, the M11-8MV can magnify fine textures and let students easily see details from wherever they're sitting. Never again deal with students crowding around, pushing and shoving to get a closer look.

A3 Shooting Area for Any Angle

The M11-8MV's A3 shooting area and rotatable camera allow you to freely present large documents and 3D models from any angle - whether you're teaching in-class or online. A thoughtful position indicator on the camera head ensures the correct display angle.

Playback for Content Evolution

Struggling to monitor class progress? Video playback eases your pain! Images and videos captured by the M11-8MV can be replayed instantly and repeatedly, so you can level-up your lesson-planning efficiency.

Make Your Mouse a Handy Pen

Connect your mouse to the M11-8MV to add annotations. Use this feature to emphasize key points that students can pick up with a glance, and instantly transform traditional textbooks into digital resources!

Built-In Microphone

There's no need to bother with an extra microphone. The M11-8MV's built-in mic clearly picks up voices even when speakers are up to three meters away with their backs to it. Micro SD and USB slots let you store recorded files however you prefer.

Multiple I/O Ports Provide Diversity

Diverse I/O ports fulfill various connection needs! The M11-8MV links to displays through HDMI and VGA. Also, it connects to computers via USB cable for convenient charging.

AVerTouch Software

AVerTouch is ultra-powerful software designed exclusively for AVer visualizers. One touch connects your visualizer with mobile devices for content sharing, and you can sync to the cloud to automatically save annotated, captured, and recorded files. Teaching is incredibly fun when you use AVerTouch to engage with your students.
