True WDR: By analyzing and blending different exposures, True WDR ensures both bright and dark areas remain properly exposed, delivering a well-balanced and natural-looking image even in environments with high-contrast lighting.△

Smart IR: Smart IR dynamically adjusts infrared lighting to prevent overexposure and glare, improve visibility at different distances, and ensure clearer footage.

3D DNR: 3D DNR is a noise reduction technology that analyzes image data across frames to selectively reduce noise while preserving important details.

White Balance: White Balance ensures that white appears neutral in an image, regardless of the lighting conditions.

Efficient H.265+ Compression Technology

H.265+ reduces the required bandwidth and storage space for videos while maintaining excellent image quality. It saves 57.5% and 15% more storage space compared to H.264 and H.265, respectively.
