Aprašymas

DELIVER AN UNSURPASSED CHECKOUT EXPERIENCE IN THE BUSIEST STORES

Meet the demands of your highest-volume point-of-sale lanes with Zebra’s MP7000 next generation multi-plane 1D/2D bioptic imager. The MP7000 is loaded with features that take scanning performance and simplicity to the next level for faster-than-ever checkout in cashier-manned and self-checkout lanes, increased cashier productivity and point of sale (POS) throughput — and a better shopping experience.

FASTEST CHECKOUT PERFORMANCE

Zebra’s most advanced scanning technology ensures the instant capture of virtually every electronic and printed barcode. The largest scan zone in this product class delivers true "swipe-and-go" capability. And with the optional customer side scanner, your customers can scan electronic and physical coupons and loyalty cards — instead of your cashiers.

INDUSTRY-BEST TCO

A smart investment, the MP7000 offers an unmatched industry-best total cost of ownership (TCO) by delivering maximum uptime and minimum power consumption – up to 60 percent less than competitive devices. Solid state technology means no moving parts, providing the fewest failure points in this class. With fewer parts and components to service, and an upper housing that can be removed without tools, repair and maintenance couldn’t be easier. And since the MP7000 is designed to fit into your existing cash wrap, you can easily upgrade your POS lanes with the very latest technology.

INNOVATION AT THE POS

A high-resolution 2.3 Megapixel color camera supports new applications that deliver major business benefits. With product recognition and identification applications, the camera can identify items like produce, enabling a shortened picklist for simpler and faster checkouts. You can also help reduce self-checkout related losses by verifying the proper barcode is scanned for an item.
