Aprašymas

A compact and lightweight assistant NAVITEL AIR8 MINI is a compact compressor that allows to inflate wheels of bicycles and scooter on the go. Its dimensions comparable to those of a phone charging adapter (70x41x28 mm) and weight of only 110g allow to put it not only in the trunk or a backpack, but also into a typical jacket's pocket. Not just a road partner NAVITEL AIR8 MINI will serve as an excellent assistant on a sports ground or in the countryside. Three nozzles supplied with the device and its high performance rated at 8 liters of air per minute allow the pump to quickly restore operability of a football or a scooter wheel deflated at the wrong moment. Universal charging The compressor is powered by a small yet capable battery that can be charged from almost any source, be it a laptop, power bank, car charger or a regular power outlet. Only around 25 minutes and the pump will be ready to work again. There's only one requirement – NAVITEL AIR8 MINI must be connected to a source with a USB-C cable. The LED indicator will signal when the device is fully charged and can be unplugged. More than just a pump NAVITEL AIR8 MINI can be used as a bicycle taillight so that you can be seen at night. To do this, just turn the device on: the on/off button will light up in red and the compressor will be ready to be mounted on the frame with a Velcro fastener. The included silicone case will help protect your device from water and road dirt. Type: Portable | Pumping pressure (bar): 7 | Power supply: built-in battery | Charging voltage (V): 5 | Charging current (A): 1.5 | Battery capacity (mAh): 2x350 | Charging time (h): 0.4 | Connectors: USB Type-C | Dimensions (mm): 70x41x28 | Weight (g): 110 | Color: Metallic | Included: USB-C charging cable, Protective case, Needle for inflating balls, Schrader valve adapter, Presta valve adapter, Flexible extension tube, Velcro tape, Lanyard
