Aprašymas

Transcription made easy with a Philips foot pedal

The ergonomic design of the new Philips foot pedal range sets new standards in terms of usability in the professional dictation arena. The development is based on detailed research into the movements made during transcription. Transcriptionists can stop and start playback with only a slight movement of the heel, and without lifting the foot unnecessarily, which both increases efficiency and makes the device a pleasure to work with.

Outstanding audio quality with Philips transcription headphones

Lightweight under-the-chin style stereo headphones designed to deliver excellent sound quality, with soft ear cushions for wearing comfort, and a hanging bracket that attaches the headset to a monitor.

Bring stereo sound output to your computer with the Philips USB audio adapter

Add stereo sound output to computers via the USB port even if they lack a sound card. Connect virtually any headphones or speakers. Just plug them into the adapter and plug the adapter into a USB port. There is no software driver to install or external power adapter needed.
