Aprašymas

4K UHD Car DVR PNI Voyager S1700 is a car DVR dash cam with G-Sensor (Gravity Sensor) function and Ultra HD video resolution (with the possibility of 4K, 2K or 1080P modification). It is a compact and discreet device with a 3.0-inch IPS (640 x 480) screen, designed to record high-quality video while driving. Generous and intuitive display The PNI Voyager S1700 DVR car camera features a generous 3-inch IPS screen on which you can see the recording images. The screen also allows access to the DVR's settings menu. Maximum resolution 4K Ultra HD The PNI Voyager S1700 records video at a resolution of 3840 x 2160 pixels, providing extremely clear images. This is especially useful for identifying license plates and other details, even in low light conditions. Parking monitoring function Through the Parking function, the car DVR can monitor the vehicle even when it is parked and the engine is stopped. The DVR automatically starts recording if motion or an impact is detected, helping to save incidents such as bumps or vandalism. To benefit from this function, you need a special power cable (product code PNI-PC-DVR) Manufacturer: PNI | Display : 3 inch LCD | Number of cameras: 1 | Main camera resolution: 4K (3840 x 2160) | Frame rate: 25 fps | Viewing angle: 170° | Megapixel count: 4
