Aprašymas

A configurable LoRaWAN sensor tag; a flexible and cost-effective tool to gather data and make informed operational decisions. Monitor temperature, humidity, motion and events with a configurable LoRaWAN sensor tag designed for demanding IoT deployments.

TG-LR82 combines environmental and motion sensing with onboard data processing. High-accuracy temperature reporting makes the TG-LR82 extra suitable for monitoring temperature-sensitive goods and environments. The device can generate temperature and humidity averages or histograms before transmitting telemetry. This reduces network traffic while preserving valuable insights about environmental conditions.
