Aprašymas

Etenwolf S3 Car Air Compressor, 11.03 bar, 7800 mAh

The Etenwolf Zephyr S3 is an advanced cordless air compressor designed for users who expect high performance, long runtime, and reliability. The device generates a maximum pressure of 160 PSI (11.03 bar) and an airflow of up to 22 L/min, allowing you to quickly inflate the tires of passenger cars, SUVs, light pickup trucks, motorcycles, and bicycles. Thanks to its metal motor and two-cylinder design, the compressor offers pumping speeds up to twice as fast as standard models, and the manufacturer claims a service life up to three times longer than that of typical electric pumps. In addition, an LED light makes it easier to use the compressor after dark and during roadside breakdowns.

Fast inflation and continuous, uninterrupted operation

The compressor is equipped with an efficient drive system and an active cooling system that allows for uninterrupted operation without the need for breaks to cool the unit. Thanks to its 100% duty cycle, you can inflate all four tires of your car one after another without interrupting operation. The device can increase the tire pressure of a 235/45 R18 SUV tire from 30 to 35 PSI in less than a minute. With a high output power of 132 W, the S3 also handles larger tires used on recreational and utility vehicles with ease.

7800 mAh battery and power bank function

The built-in 7800 mAh lithium battery ensures long runtime on a single charge. A full charge allows you to inflate up to 16 235/45 R18 tires from 30 to 35 PSI. Charging is done via a USB-C port supporting 15 W input power, allowing the device to be powered using common USB-C chargers. Additionally, the compressor functions as a power bank, enabling you to charge mobile devices while on the go.

Smart operating modes and accurate pressure measurement

The Etenwolf S3 offers several predefined operating modes tailored to various applications. The car mode allows you to set the pressure from 8 to 130 PSI, the bike mode from 10 to 145 PSI, and the ball mode from 3 to 16 PSI. A manual mode is also available, with a full adjustment range from 3 to 160 PSI. The built-in pressure sensor ensures measurement accuracy of ± 1 PSI, and the auto-stop feature stops pumping once the set value is

reached. An additional convenience is the memory for recently used settings.

Included in the set

- Compressor
- Hose
- USB-C cable
- Hose clamp
- Conical adapter
- Ball needle
- Presta adapter
- User manual

Manufacturer	Etenwolf
Model	S3 Zephyr
Battery capacity	7800 mAh
Maximum pressure	160 PSI (11.03 bar)
Air flow	22 L/min (0 PSI)
Output power	132 W
Input power	15 W
Measurement accuracy	±1 PSI
LED lighting	300 lm
Charging port	USB-C
Operating temperature range	from -20°C to 74°C
Intended use	Passenger cars, SUVs, light pickup trucks, motorcycles, bicycles, sports balls, etc.
