Aprašymas

Etenwolf S5 Car Air Compressor, 11.03 bar, 15600 mAh

The Etenwolf S5 is an advanced air compressor designed for drivers who expect top performance and a high degree of independence from power sources. Equipped with a 15,600 mAh battery and a powerful metal motor, it generates an airflow of up to 42 L/min at a maximum pressure of 160 PSI (11.03 bar). As a result, it can increase the tire pressure of an SUV with 235/55 R20 tires from 30 to 35 PSI in less than a minute. With a high power output of 216 W, the device handles passenger cars, SUVs, pickup trucks, motorcycles, bicycles, and sports equipment with ease.

15,600 mAh Battery and Power Bank Function

The built-in 15,600 mAh lithium battery provides impressive performance on a single charge. The compressor can inflate up to 30 SUV tires (size 235/55 R20) from 30 to 35 PSI, making it an excellent solution for both everyday use and longer trips. The device also functions as a power bank, allowing you to charge smartphones, tablets, and other mobile devices. Support for USB-C fast charging at up to 45 W and 30 W PD technology can cut the charging time for compatible devices by up to half.

6 operating modes and a wide pressure adjustment range

The Etenwolf S5 offers six dedicated pumping modes that let you quickly adjust the settings to a specific application. Users have access to modes for cars, motorcycles, bicycles, balls, pickup trucks, and a manual mode. With a pressure adjustment range of 3 to 160 PSI, the device can handle everything from small sports equipment to larger vehicles. The built-in pressure sensor ensures measurement accuracy of ± 1 PSI, and the auto-stop feature stops pumping once the selected value is reached.

Active Cooling and Continuous Operation

An active cooling system ensures stable operation by helping to maintain optimal component temperatures during intensive use. This allows the compressor to operate efficiently for longer periods without the need for frequent breaks. This is particularly useful when servicing multiple vehicles or inflating a large number of tires during trips and off-road excursions.

Emergency lighting and user-friendly design

The built-in LED lighting enhances the convenience of using the compressor after dark and during roadside emergencies. In addition to the standard light, there are also flashing and SOS modes that can help in emergency situations. The device can also serve as a camping lantern. An additional advantage is the integrated carrying handle, which makes it easy to transport, and the compact design, which allows you to conveniently store the compressor in the trunk, glove compartment, or under a seat.

Included

- Car compressor
- Power cord
- USB-C cable
- Inflation adapters
- User manual

Manufacturer	Etenwolf
Model	S5
Battery capacity	15,600 mAh
Maximum pressure	160 PSI (11.03 bar)
Air flow	42 L/min (0 PSI)
Output power	216 W
Input power	45 W
Measurement accuracy	±1 PSI
PD charging power	30 W
Measurement units	PSI, kPa, BAR
Charging port	USB-C
Operating temperature range	-20°C to 74°C
Intended use	passenger cars, SUVs, pickup trucks, motorcycles, bicycles, sports balls, etc.
