Aprašymas

Etenwolf S6 Car Compressor 11.03 bar 19,200 mAh (orange)

The Etenwolf S6 (Vortex S6) is the most advanced compressor in the manufacturer's lineup, designed for large vehicles and demanding users. Equipped with a 19,200 mAh battery, 216 W of power, and a two-cylinder motor, it generates an airflow of up to 42 L/min at a maximum pressure of 160 PSI (11.03 bar). As a result, the device can easily handle pickup trucks, off-road vehicles, RVs, passenger cars, motorcycles, and bicycles. At the same time, it offers a separate mode for inflating large volumes of air, making it ideal for mattresses, mats, pools, and inflatable boats. It's a versatile solution for those who want a single device for multiple uses.

Twin-cylinder engine and fast inflation of large tires

High performance is ensured by a metal twin-cylinder engine that inflates up to twice as fast as standard designs. The compressor can increase the pressure in a 245/70 R17 (31") pickup truck tire from 30 to 35 PSI in less than a minute. A maximum airflow of 42 L/min allows for efficient operation of both vehicle tires and larger pneumatic accessories. Measurement accuracy of ± 1 PSI enables precise pressure control during every operation.

Two Inflation Modes

The S6 stands out for its two independent inflation modes. The first is designed for high pressure and works well for cars, pickup trucks, RVs, and bicycles. The second is designed for quickly inflating large items that require a greater volume of air, such as mattresses, sleeping pads, inflatable pools, and inflatable boats. As a result, a single device can replace both a traditional car compressor and a pump for camping gear.

19,200 mAh Battery and Power Bank Function

The built-in 19,200 mAh lithium battery ensures a very long runtime. On a single charge, the compressor can inflate up to 18 Ford F-150 pickup tires (size 245/70 R17) from 30 to 35 PSI. The USB-C port supports 45 W bidirectional fast charging, allowing the device to be charged quickly and used as a powerful power bank to charge smartphones, tablets, and other electronic devices.

100% Duty Cycle and Active Cooling

An advanced cooling system and a durable twin-cylinder design allow for continuous operation without the need for breaks. The manufacturer claims the unit can inflate all four tires of an F-150 pickup from 0 to 35 PSI in a single uninterrupted operating cycle. Reduced component heating enhances user comfort and improves the unit’s durability during intensive use.

7 operating modes and smart operation

The compressor is equipped with seven preset operating modes, including dedicated settings for cars, pickup trucks, and RVs. The easy-to-read digital display shows both the current pressure and the target value. The settings memory function allows you to quickly return to your most frequently used parameters, and the automatic shut-off feature stops pumping once the set value is reached, enhancing convenience and safety.

Powerful LED lighting and practical accessory storage

The built-in 1,000-lumen LED light can serve as a work light or a camping lantern. Users have access to steady, flashing, and SOS modes, which are useful during roadside breakdowns and emergencies. The case also includes storage spaces for accessories, such as a tire repair needle and a Presta valve adapter, ensuring that all components of the kit remain organized and always within reach.

Included in the set

- Car compressor
- 45 W AC charger
- Charging cable
- High-pressure hose
- Hose for large air volumes
- Ball needle
- Presta adapter
- Clamp adapter
- Carry bag

Manufacturer	Etenwolf
Model	S6 (Vortex S6)
Color	Orange
Battery capacity	19,200 mAh
Maximum pressure	160 PSI (11.03 bar)
Airflow	42 L/min (0 PSI)
Output power	216 W
Input power	45 W
Measurement accuracy	±1 PSI
Motor	Metal, two-cylinder
Display	Digital
LED lighting	1000 lm
Charging port	USB-C
Fast charging	45 W
Operating temperature range	from -20°C to 74°C
