Aprašymas

Etenwolf S6 SE Car Air Compressor, 11.03 bar, 15,600 mAh

The Etenwolf S6 SE is an advanced cordless compressor equipped with an efficient two-cylinder pumping system, a 15,600 mAh battery, and two operating modes designed for high pressure and high air volume. The device delivers an airflow of up to 42 L/min at a maximum pressure of 160 PSI (11.03 bar), making it ideal for use with passenger cars, pickup trucks, RVs, motorcycles, and bicycles. Additionally, it can be used to inflate mattresses, air pillows, and other inflatable travel accessories. It's a versatile solution for drivers, travelers, and outdoor enthusiasts.

Twin-cylinder design and lightning-fast inflation

The S6 SE features a powerful twin-cylinder motor that provides inflation speeds up to twice as fast as standard compressors. The device can increase the pressure in a 245/70 R17 (31") pickup truck tire from 30 to 35 PSI in less than a minute. The manufacturer also states that it can inflate a 31-inch tire from 0 to 35 PSI in about 1 minute. Measurement accuracy of ± 1 PSI allows for precise pressure control, and the automatic shut-off feature stops the pump once the set value is reached.

Two Inflation Systems

The kit includes two hoses designed for different applications. The high-pressure hose is ideal for inflating car, motorcycle, and bicycle tires, while the high-volume hose allows you to quickly inflate mattresses, air pillows, inflatable pools, and other accessories that require a large amount of air. As a result, a single device can replace both a car compressor and a travel pump.

15,600 mAh battery and power bank function

The built-in 15,600 mAh lithium battery ensures long operating time without the need for frequent recharging. On a single full charge, the device can inflate up to 18 Ford F-150 pickup tires (size 245/70 R17) from 30 to 35 PSI. The compressor is also equipped with a USB-C port supporting fast charging up to 30 W and a power bank function that allows you to charge smartphones, tablets, and other electronic devices while on the go.

7 operating modes and a clear digital display

The compressor offers seven predefined operating modes, including settings specifically designed for cars, pickup trucks, and RVs. The digital screen displays the current and target pressure, giving you full control over the inflation process. Additionally, the device allows you to switch between PSI, kPa, and BAR units of measurement and remembers your most recently used settings, which speeds up future use.

Active Cooling and Powerful LED Lighting

An active cooling system ensures stable operation by limiting component overheating during prolonged use. This allows the device to operate continuously without the need for frequent breaks. The built-in 1,000-lumen LED light provides effective illumination during nighttime repairs and roadside breakdowns. Flashing and SOS modes are also available, enhancing safety in emergency situations.

Included

- Car air compressor
- Valve clamp
- High-pressure hose
- High-flow hose
- USB-C to USB-C cable
- Ball needle
- Inflatable accessory adapter
- Presta adapter

Manufacturer	Etenwolf
Model	S6 SE
Battery capacity	15,600 mAh
Maximum pressure	160 PSI (11.03 bar)
Air flow	42 L/min (0 PSI)
Output power	216 W
Input power	45 W
Measurement accuracy	±1 PSI
Motor	Twin-cylinder
Display	Digital
Pressure units	PSI, kPa, BAR
LED lighting	1000 lm
Power bank function	Yes
Device charging power	30 W
Charging port	USB-C
Operating temperature range	from -20°C to 74°C
