Aprašymas

Fanttik X10 Pro Max Cordless Tire Inflator

The Fanttik X10 Pro Max is a powerful, portable cordless inflator that can inflate an R15 tire in just about 35 seconds (30–33 PSI) and reaches a maximum pressure of up to 150 PSI. Thanks to precise sensors and AccuInflate technology, it automatically controls the inflation process and stops once the set value is reached. The built-in 27.75 Wh battery allows for multiple uses on a single charge, and the easy-to-read display makes operation a breeze. It's a practical solution for drivers, cyclists, motorcyclists, and more!

Fast inflation and high performance

The device stands out for its very short inflation time—an R15 tire reaches the correct pressure (30 to 33 PSI) in just about 35 seconds. With a maximum pressure of 150 PSI, the compressor is ideal not only for passenger cars but also for bicycles, motorcycles, and inflating balls. High performance saves time and gets you back on the road quickly!

Smart control and automatic shut-off

AccuInflate technology uses precise sensors and a pressure compensation system, ensuring accurate and safe inflation. Once the set pressure is reached, the device automatically stops, eliminating the risk of over-inflation. Additionally, the unique start-up system allows you to turn on the compressor by pulling the hose—no need to search for the right buttons every time!

Clear display and pre-set modes

The compressor is equipped with a clear display that shows the current pressure in real time. You have five operating modes at your disposal (car, motorcycle, bicycle, ball, and manual mode), as well as the option to select units (PSI, BAR, KPA). Just a few clicks are enough to select the right settings and start pumping!

High-capacity battery

The high-capacity 27.75 Wh battery ensures long runtime without the need for frequent recharging. On a single charge, you can inflate up to 16 car tires (30-35 PSI), 78 motorcycle tires (25-29 PSI), 78 bicycle tires (80-100 PSI), or 68 balls (0-8 PSI).

LED lighting and user comfort

The built-in LED flashlight makes it easier to use the compressor after dark or in dimly lit areas. You can also choose between two lighting modes: Normal and SOS, which increases safety in emergency situations. The compact build and thoughtful design make the device easy to transport and ready to use at any moment, and the built-in storage compartment allows you to keep accessories directly inside, so you always have everything you need at your fingertips.

Included

- Compressor
- Needle valve adapter
- Presta valve adapter
- Charging cable
- Air hose
- User manual

Manufacturer	Fanttik
Model	X10 Pro Max
Maximum pressure	150 PSI
Battery capacity	27.75 Wh
Units of measurement	PSI, BAR, KPA
Charging power	15 W
LED lighting	Yes, 200 lm
Operating modes	Car, Motorcycle, Bike, Ball, Manual
Screen dimensions	Approx. 7 x 4.5 cm
Weight	Approx. 1.1 kg
