Aprašymas

MOVA TPEAK AI NOTE Voice Recorder

The MOVA TPEAK AI NOTE is an ultra-slim voice recorder designed for convenient and discreet recording of conversations, meetings, and lectures. The device is shaped like a card and is just 2.89 mm thick, so it fits easily in a wallet or pocket. Built-in AI features enable automatic transcription, translation, and the creation of recording summaries, making it easier to use the collected information later.

Ultra-slim card-style design

The voice recorder is just 2.89 mm thick and weighs approximately 28 g. This makes it easy to store in a wallet or carry alongside a smartphone without adding bulk. The slim design also ensures the device remains discreet during recording.

Magnetic attachment to a smartphone

The device features a built-in magnetic attachment system that allows you to quickly attach it to the back of your phone. This enables the voice recorder to capture conversations and meetings without the need for additional mounts or cases.

Smart recording with AI

The artificial intelligence technologies used automatically recognize speech and start recording only when they detect a voice. This helps save memory and battery life. The system can also distinguish between phone call recordings and ambient recordings, automatically adjusting the operating mode.

Transcription and translation in multiple languages

Recordings can be automatically converted to text using AI models. This feature works both after the recording is finished and in real time. Additionally, a translation module is available to facilitate communication in international conversations.

Smart summaries and recording analysis

The AI system can create summaries of recordings and organize content in the form of structured notes or mind maps. The voice recorder can also distinguish between 3 to 5 speakers during a single conversation, which facilitates the analysis of meetings or interviews.

Fast data transfer via Wi-Fi

Thanks to dual-band Wi-Fi, audio files can be transferred up to 50 times faster than via Bluetooth. In practice, this means you can transfer an hour-long recording in about 10 seconds.

Wireless charging and long battery life

The device supports the Qi charging standard and reverse charging from smartphones or power banks. The built-in 130 mAh battery allows for over 24 hours of continuous recording. Thanks to low-power technology, the voice recorder can remain in standby mode for up to a year.

Included in the set

- MOVA TPEAK AI NOTE AI voice recorder
- Magnetic induction ring
- Charging cable
- Scratch-resistant protective film

Manufacturer	MOVA
Model	TPEAK AI NOTE
Device type	AI voice recorder / smart voice recorder
