Aprašymas

Magcubic HY310X Projector

The Magcubic HY310X is a versatile projector that combines native 1080p Full HD resolution, 4K content support, and 420 ANSI lumens of brightness, delivering a clear and detailed image even on a screen up to 150 inches in size. Thanks to its exceptionally short throw ratio of 0.8:1, you can project a massive image from a short distance (e.g., 150" from just 2.6 m), making it the perfect solution for smaller rooms. The built-in Android 11 system, powered by an Allwinner H726 processor, along with Wi-Fi 6 and Bluetooth 5.2 connectivity, transforms the device into a smooth-running entertainment hub, perfect for movies and lag-free gaming.

Cinema-quality picture at home and outdoors

Native 1080p Full HD resolution combined with support for 4K content ensures a sharp and detailed image. The use of a unique, double-coated lens makes the projection even brighter and clearer. A brightness of 420 ANSI lumens ensures comfortable viewing of your favorite content. The projector can display images ranging from 60" to 150", guaranteeing a truly cinematic experience—both in the living room and during evening outdoor screenings.

Perfect image without adjustment

The Magcubic HY310X projector automatically focuses using the Auto Focus feature, eliminating the need for manual adjustment and ensuring immediate image clarity. The system is supported by automatic vertical keystone correction (Auto Vertical Keystone / 4D), which automatically straightens the image along the vertical axis. Additionally, the 4P Keystone manual correction allows for precise manual adjustment of each of the four corners individually, enabling perfect geometry even during side projection.

Smooth operation - WiFi 6 and Bluetooth

The use of dual-band WiFi 6 (2.4G + 5G) ensures a stable and lightning-fast network connection, guaranteeing smooth video streaming and lag-free gameplay. The Bluetooth 5.2 module allows for wireless and convenient connection of external audio systems, such as headphones or speakers. The

projector offers complete freedom for wireless image transmission thanks to support for DLNA, AirPlay, and Miracast standards. Additionally, the Wired Precision feature enables stable, wired screen sharing from iOS and Android devices, eliminating signal interference in all conditions.

Android 11 - Your entertainment hub without additional devices

The built-in Android 11 system, powered by a high-performance Allwinner H726 processor, transforms the projector into a standalone multimedia device. This allows you to use popular streaming apps, such as Netflix or YouTube, directly from the projector—without having to connect a laptop or TV dongle. Enjoy your favorite movies, TV shows, and online content with complete independence and ease of use.

Adjust the image to your needs

You can easily switch the screen aspect ratio between 4:3 and 16:9, allowing you to perfectly tailor the display for movies, presentations, or games. With the digital zoom function ranging from 80% to 100%, you can precisely zoom in or out without having to physically move the device. Additionally, the HY310X model lets you choose from dedicated picture modes: Standard, Highlight, and Energy Saving, giving you full control over the style and brightness of the projection.

Built-in speaker - watch and listen right away

The 5W speaker delivers sound that's ready to go the moment you turn on the device. This is an extremely convenient solution during screenings, trips, or when using the projector outdoors, eliminating the need to bring along additional sound equipment. Thanks to this, the Magcubic HY310X becomes a completely self-sufficient, portable cinema.

Seamless connectivity - use it however you like

The projector is equipped with a set of essential ports, including HDMI, USB, and a 3.5 mm audio jack. This configuration allows for hassle-free connection of various devices, such as game consoles, laptops, USB storage devices, or headphones. This allows you to freely use various video and audio sources, tailoring the HY310X to your individual entertainment needs.

Flexible placement thanks to the 180° swivel design

The projector is equipped with a flexible, integrated stand that allows for 180° rotation. This design enables you to instantly switch the projection direction from wall to ceiling (90° angle), allowing you, among other things, to comfortably watch movies while lying down. This solution provides complete freedom of arrangement, allowing for projection at almost any angle, perfectly adapting to the specific characteristics of any room—from the living room to the attic bedroom.

Manufacturer	Magcubic
Model	HY310X
Max. native resolution	1080P
Max. brightness	420 ANSI
Signal support	Up to 4K
System	Android 11
Processor	Allwinner H726
Keystone correction	Automatic (vertical)
Focus adjustment	Automatic
Connectivity	Wi-Fi 6 (Dual Band), Bluetooth 5.2, HDMI, USB
Built-in speaker	Yes

Speaker power	5 W
Zoom	80-100%
4P correction	Manual
