- ✓ No touch mode
- ✓ Touch mode
- ✓ Colour-coded temperature guidance
- ✓ Silent mode for middle-of-the-night readings
- ✓ Backlight for night time reading
- ✓ Clinically-proven accuracy
- ✓ Positioning guidance system

Aprašymas

Forehead thermometer with both no touch and touch functions. Designed with convenience in mind, it allows you to take a measurement in only a couple of seconds by aiming in the middle of the forehead, in between the eyebrows.

No touch mode

The non-invasive no touch feature takes readings from up to 2.5 centimeters away. Perfect to take the temperature of a child without disturbing her

Touch mode

The touch feature allows you to easily and quickly measure temperature with no need to swipe - ideal for self-measurement

Colour-coded temperature guidance

The back-lit, colour-coded display will let you know in a glance if the fever temperature is getting better or worse. The large screen changes from green (normal) to yellow (Fever) to red (High Fever) depending on the temperature reading

Silent mode

Allows you to take the temperature without a sound - great when using the thermometer in no touch mode to avoid waking up a sleeping child

Positioning guidance system

Always get consistent and clinically accurate readings with thermometer's positioning guidance system.

These thermometers are not intended for clinical use in a professional environment and are for home usage only. This thermometer is not intended to interpret hypothermic temperatures.

Techninė specifikacija

Features	
Type	Remote sensing thermometer
Product colour	White
Thermometer location	Forehead
Control type	Buttons
Units of measurement	°C
Measurement modes	Body temperature
Measurement time	2 s
Suitable for new-borns	Yes
Power	
Battery type	AA
Number of batteries supported	2
Weight & dimensions	
Width	135 mm
Depth	62 mm
Height	250 mm

Weight	310 g
--------	-------

Packaging content

Manual	Yes
--------	-----

Batteries included	Yes
--------------------	-----
