Aprašymas

AMZCHEF CE-NY-8088MJD Jar Blender

The AMZCHEF CE-NY-8088MJD jug blender is a 2000 W appliance that reaches speeds of up to 25,000 RPM. It features 8 blades, a 2-liter jug, 8-speed settings with a pulse function, and 4 automatic programs: Ice Crush, Smoothie, Grind, and Juice. It operates at a noise level below 70 dB, features a safety system, efficient cooling, a 30-second self-cleaning function, and compact dimensions, making it easy to fit into your kitchen space.

High power and fast blending

The 2000 W motor ensures adequate performance for everyday use and more demanding tasks. As a result, the blender can handle not only soft fruits but also hard ingredients such as nuts, grains, or ice cubes. A high rotational speed of up to 25,000 rpm accelerates the entire blending process and ensures a uniform consistency. As a result, drinks, creams, and sauces are noticeably smoother and more refined.

8 blades and precise operation

The 8-blade system ensures more thorough chopping of ingredients, as the blades operate at different angles. This allows ingredients to be broken down more effectively and mixed evenly throughout the jar. This solution reduces the need for manual stirring and shortens preparation time. In practice, this results in a better texture for smoothies, spreads, or cream soups.

Large capacity and practical dimensions

The 2-liter jar allows you to prepare larger portions at once, which is convenient for everyday use. This allows you to quickly prepare drinks or meals for several people without having to break the process into stages. At the same time, the appliance's dimensions—48 cm in height, 19 cm in width, and 18 cm in depth—make it easy to place the blender on the kitchen countertop. This design allows the appliance to fit better into available space, such as under cabinets.

Various modes and full control

The blender offers 8 speed levels and a pulse function, allowing you to precisely adjust the operation to the type of ingredients. Additionally, 4 automatic programs—Ice Crush, Smoothie, Grind, and Juice—simplify the preparation of specific dishes. With them, a single press is all it takes to select the appropriate operating parameters. This solution reduces operating time and makes using the device more intuitive.

Quiet and stable operation

With a noise level below 70 dB, the blender is not excessively noisy during operation. This allows you to use it at various times of the day without significant discomfort. The non-slip base improves the device's stability, which is important at high speeds. The stable construction reduces vibrations and enhances safety during use.

Cooling system and safety

An efficient ventilation system allows for longer operation without the risk of the motor overheating. This makes the device better suited for intensive use. The blender is also equipped with a safety feature that prevents the jar from being assembled incorrectly, which prevents accidental startup. Such solutions increase safety and contribute to the durability of the equipment.

Quick cleaning

The self-cleaning function allows you to keep the blender clean without having to disassemble all the parts. Simply add water with detergent and turn on the device to thoroughly rinse the jar. The entire process takes about 30 seconds, which saves a significant amount of time. This makes daily use of the blender more convenient and less of a hassle.

Included

- AMZCHEF CE-NY-8088MJD jug blender
- Ingredient pusher

Manufacturer	AMZCHEF
Model	CE-NY-8088MJD
Device type	Jug blender
Power	2000 W
Rotational speed	up to 25,000 rpm
Number of blades	8
Jug capacity	2 liters
Speed control	8 levels
Pulse mode	yes
Automatic programs	Ice Crush, Smoothie, Grind, Juice
Noise level	below 70 dB
Self-cleaning function	yes (approx. 30 seconds)
Dimensions	48 × 19 × 18 cm

Gross weight: 4880, Net weight: 4500, Box length: 36,50, Box width: 25,00, Box height: 32,00, GPSR Link: https://psr-assets.innpro.pl/small_appliances/sg_small_appliances_blenders.pdf
