Aprašymas

AMZCHEF Slow Juicer

The AMZCHEF SJ-036CBK slow juicer is designed for convenient, everyday preparation of fresh beverages. It combines automatic ingredient feeding, a large 2.5-liter hopper for whole fruits, and a 1.8-liter juice pitcher, allowing you to prepare a larger portion in a single go. Additionally, with a noise level of up to 50 dB, the appliance operates significantly quieter than standard juicers. The appliance allows you to prepare not only juices but also sorbets and plant-based beverages, such as oat or nut milk.

Automatic juicing and a large chamber

The automatic ingredient feeding system reduces the need for manual operation. Simply load the ingredients into the spacious container, and the device processes them on its own. This means that preparing juice does not require constant supervision, which saves a significant amount of time.

Wide 165 mm feed chute

The large diameter of the feed chute (165 mm) allows you to insert larger pieces, and in many cases even whole fruits and vegetables without the need for pre-cutting. This means that preparing ingredients takes less time, which is especially important for daily use. Less handling of the produce is also convenient—you don't have to precisely adjust the size of the pieces to fit the appliance.

Specifications and storage

Thanks to slow-speed technology, the juicing process is cold-press. This corresponds to cold-press technology, which prevents oxidation and overheating of the juice. As a result, the drink retains a more natural taste and freshness, and can additionally be stored in the refrigerator for up to 72 hours without any noticeable loss of quality.

Powerful motor and quiet operation

The 250 W motor can handle even harder ingredients, such as carrots or apples. At the same time, a noise level of up to 50 dB makes the device noticeably quieter than many standard models, which enhances user comfort.

Advanced filtration system

The triple microfilter uses different filtration levels: larger holes of about 2 mm trap larger pulp, a 0.8 mm layer reduces clogging, and a fine 0.5 mm structure ensures the final clarity of the juice. This results in a smoother and more uniform beverage.

Safety and materials

The juicer is made of BPA-free materials, including durable Tritan, which is important for food contact. Additionally, the Lid-Open Stop feature automatically stops the device when the lid is opened, and a safety lock prevents operation if the unit is not assembled correctly.

Auto-reverse function and stable operation

If ingredients become jammed, the device automatically reverses the rotation direction, allowing you to quickly unclog the mechanism without having to disassemble the juicer. This ensures that even harder or fibrous ingredients do not cause interruptions in operation. The AMZCHEF SJ-036CBK is ideal for preparing fruit and vegetable juices, as well as sorbets and plant-based milk. As a result, you get a juicer that combines ease of use, quiet operation, and versatility, while allowing you to efficiently utilize ingredients without unnecessary waste.

Easy cleaning and thoughtful design

The removable pulp outlet allows for more thorough removal of residue after juicing, which significantly simplifies keeping the device clean. As a result, areas that are often difficult to rinse in standard juicers can be quickly cleaned under running water here. Fewer hard-to-reach parts mean cleaning takes less time, which in practice encourages more frequent daily use of the appliance.

Included

- AMZCHEF SJ-036CBK juicer
- 2.5 L ingredient hopper
- 1.8 L juice pitcher
- Pulp container

Manufacturer	AMZCHEF
Model	SJ-036CBK
Type	Slow juicer (cold press)
Power	250 W
Noise level	up to 50 dB
Ingredient hopper capacity	2.5 L
Juice pitcher capacity	1.8 L
Feed chute diameter	165 mm
Material	Tritan (BPA-free)
Filtration system	Triple microfilter (2 mm / 0.8 mm / 0.5 mm)
Features	Auto-reverse, Lid-Open Stop, safety lock, overheat protection

Gross weight: 4600, Net weight: 3900, Box length: 44,00, Box width: 19,50, Box height: 34,50, Last delivery: 20.10.2026, GPRS Link: https://psr-assets.innpro.pl/small_appliances/sg_small_appliances_kitchen_accessories.pdf
